

## LESSON PLAN

Date:  Time:  Focus for Lesson:

Lesson Plan No:  of

This lesson plan is linked to Activity No:  in “ideas for integrating ICT” Vol 4

Learning Intentions:

New Vocabulary  Resources:

Time	Teacher Action	Pupils' Action / Pupils' Learning
<i>Introduction to Lesson</i>		
15 mins	Work with a group of 6 children. Take a photograph of them using the digital camera. Show them the image on the camera. Show them the 'record' and 'play' buttons and where to press to take a picture.	Children all have a go at taking a photograph and displaying it to the others in the group.
<i>Main part of Lesson:</i>		
30 mins	Connect the camera to the laptop, then show the group how to open the QV-Link and import the image onto the computer and 'save as' a graphic in a folder.	Pupils work in pairs to import their pictures onto the computer and save them in the folder.
<i>Plenary:</i>		
15 mins	Show the group how they can improve the image, eg despeckle, sharpen, change brightness and hue etc. until they are satisfied with the picture. They need to do this before it is saved.  Tell the group that in the next lesson they will be working independently to take photographs of their artifacts and import them into a folder on the laptop. They will then support others to do the same.	Group work in pairs to make notes for a crib sheet that they can use in the next session and then hand to the next group.

Homework opportunities: Write the crib sheet out in neat; if possible word process.	Pupil Support: Crib sheet. Pupils support each other.	Extension Activities:
